Present: Due to an error in proofreading, figure 8A is incorrect.

Corrected: The proper figure 8A is shown below. The authors sincerely apologize for this oversight.

Original article: Oncotarget. 2015; 6(31):30831-30849. doi: 10.18632/oncotarget.5036.

Figure 8: Effect of Akt and MAPK pathway on DA induces cell autophagy processes. A. SAS and OECM-1 cells were treated with DA (0–100 μ M) for 48 h and then subjected to western blotting for Akt, ERK1/2, p38 and JNK1/2 with GAPDH acting as an internal control.
