Published:

This article has been retracted: This article contains duplicated images found in other published papers. Specifically, all eight panels of Figure 6A are duplicates of those in Figure 6A of a paper published simultaneously, both which are organized in a nearly identical way [1]. Figure 4A also contains images from Figure 4A of a second paper, published earlier [2]. Figure 2A also duplicates an image from Figure 2A of a third paper published several weeks later [3]. The data and comments provided by the authors to Oncotarget did not resolve the concerns about the integrity and reliability of the reported data. Therefore, the Scientific Integrity office at Oncotarget has decided to retract this paper.
