This article has been retracted: The Office of Research Integrity Investigation (NIH) concluded that Richard L. Eckert, Ph.D. engaged in research misconduct by intentionally, knowingly, or recklessly falsifying and/or fabricating data in the thirteen (13) papers published in different journals and two (2) PHS grant applications. One paper was published in Oncotarget. Specifically, In Figure 3F the bands in rows 4 and 7 of the A375-PLX-R right-side panel, representing expression of TAZ-P (row 4) and ERK1/2 (row 7), are falsified and/or fabricated by using unrelated bands from a source image representing different proteins in an unrelated experiment. As a result, the paper was retracted from Oncotarget.
