This article has been retracted: The authors of this article have requested a retraction due to the non-reproducibility of the published data. They noted that a potentially low number of cases in the original study has led them to doubt the validity of their analysis. All authors were in agreement with this request and the Editorial decision was made to retract the article. The authors and their institution (The First Hospital of Jilin University, Changchun, Jilin, China) were notified of that decision.
